

The SmartCare Amendments

People are suffering. Health insurance costs are too high. Access to care is unfair. Drugs are too expensive. Medical bills are the most common cause of personal bankruptcies in the United States. People are forced to choose between food and medicine.

We can fix this, you and me!

The SmartCare Amendments (SCAs) to the U.S. Constitution will help to ensure everyone, poor and rich, receives high quality health care and do it for less cost.

The SCAs will protect your privacy, limit special interests, and create a national legal framework to:

- Require uniform national health insurance policies and regulations
- Make data privacy a right
- Increase competition in health insurance markets (more choice)
- Reduce special interest influence
- Transition to healthy living & advanced care planning and away from “sick care”
- Reduce special interest influence

Our Secret Weapon

The generous, welcoming, and loving people of the United States of America.

Hold a flame alight for those who have suffered from inadequate care.

 **SmartCare Alliance**

www.SmartCareAlliance.org

The solution is a new system that empowers individual choice and creates incentives to innovate to produce higher quality care. The SCAs will make it happen and also will add direct democracy to the Constitution so citizens can petition for nation-wide referendums to change health policy.

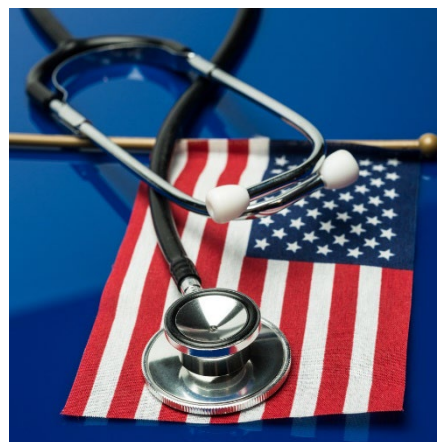

It improves Privacy Rights to protect personal information, such as image, location, phone, Internet, financial, and educational information. This even protects us against the use of unauthorized personal data in emerging technologies such as the “Internet of Things”, “big data” tracking, and other kinds of surveillance that are currently legal and hidden. The SCAs also reduce the influence of special interest groups, the root cause of many of the problems.

Member's Pledge

I solemnly swear to support and campaign for passage of the SmartCare Amendments to the Constitution of the United States of America. In my heart, I hold a flame alight for those who have suffered from inadequate care and lost the privileges of a healthy life, one of the dear Blessings of our hard fought Liberties. Together everyone achieves more as we benefit from better, more equitable care (=+) bringing compounded returns (\$) to our economy as a stronger, happier, healthier Nation (♥). I look forward to that day when these important rights for the general Welfare become a part of our Constitution.

SmartCare Amendments

- Ensuring Everybody Benefits
- Uniform Health Insurance Regulations
- Direct Democracy (Referendums)
- Health Rights, like Price Transparency
- Privacy Rights
- Prohibit Slavery
- Voters Not Lobbyists Amendment
